RAB35 Polyclonal Antibody

Cat #: G-AB-02695

Host: Rabbit **Reactivity:** Human, Mouse, Rat

Isotype: IgG **Clonality:** Polyclonal

Overview:
This gene encodes a small GTP-binding protein that belongs to the largest family within the Ras superfamily. Rab35 plays an important role in insulin-stimulated GLUT4 translocation in adipocytes.It is the target of TBC1D10A–C and that the intracellular accumulation of endosomal vesicles and impairs exosome secretion were occured when inhibition of Rab35 function.The surface of oligodendroglia in a GTP-dependent manner was localized Rab35, it increases the density of vesicles, and may have a function in docking or tethering.

Gene ID:

Accession #: NP_006852

Immunogen: Synthetic peptide of human RAB35

Conjugation: Unconjugated

Swissprot: Q15286

Calculated Molecular Weight:

Observed Molecular Weight:

Concentration: 0.3 mg/mL

Buffer: PBS with 0.05% sodium azide and 50% glycerol, PH7.4

Purification Method: Affinity purification

Application: IHC,ELISA

Dilution: IHC 1:50-1:200

Storage: Store at -20°C. Avoid freeze / thaw cycles.
