

Trusted Technical Expertise.

Columbia Analytical's Simi Valley, California facility is a nationally recognized, 22,000 square foot air testing laboratory, specializing in the analysis of ambient and indoor air pollution, stationary source emissions, process gas, and industrial hygiene samples. The laboratory has performed testing on projects for clients in all 50 United States, plus many countries internationally in Asia, Europe, South America, Africa and Australia.

We are accredited by the American Industrial Hygiene Association (AIHA) as well as the National Environmental Laboratory Accreditation Program (NELAP).

### Our Services

Columbia Analytical provides analytical support for applications such as:

- Vapor Intrusion
- Indoor Air Quality
- LEED/Green Building Testing
- Fence-line Ambient Air Monitoring
- Landfills
- Waste Water Treatment Plants
- Soil Vapor Extraction (SVE) & Remediation
- Site Characterization
- Government Projects: AFCEE, ACOE, Navy
- Industrial Hygiene
- Source Emissions Testing

In addition, we specialize in non-routine testing, such as:

- Chinese Drywall Testing
- Passive Diffusive Air Sampling
- Odor Investigations
- Product Evaluations and Materials Off-Gassing Studies
- Compound Identification

**Contact one of our technical representatives to discuss your sampling and analysis questions today.**
