

Trusted Technical Expertise.

Columbia Analytical offers a full service drinking water laboratory in Kelso, Washington. Our experienced staff has been performing drinking water testing since 1989 for inorganic and volatile organic compounds. We have instrumentation dedicated to drinking water testing and test for all the regulated and nonregulated compounds of concern.

Drinking Water Tests Offered:

- Volatile Organic Chemicals (VOCs): Phase I, II, and V Regulated and Unregulated Volatiles (Method 524.2)
- Synthetic Organic Chemicals (SOCs): Methods: 504.1, 508.1, 525.2, 531.1, 547, 548.1, 549.2, 515.4
- Inorganic Chemicals (IOCs) Metals: Methods 200 Series
- General Chemistry: Anions, Perchlorate, and other Characteristic Groups
- Disinfection By-products (DBPs) Analytes: Haloacetic Acids, Trihalomethanes, Chlorite, Bromate, Chlorate, Bromide
- Unregulated Contaminant Monitoring Rule (UCMR): UCMR 1 Contaminants - List 1
- Unregulated Contaminant Monitoring Rule 2 (UCMR 2): UCMR 2 - Both List 1 and List 2.

Certifications

Columbia Analytical is accredited under the National Environmental Laboratory Accreditation Program (NELAP) and many other state programs.

Columbia Analytical Services, Inc. is an employee-owned, full-service environmental analytical network with laboratories and service centers nationwide. Our expertise encompasses air, water, drinking water, dioxin, biological, pharmaceutical, solid and hazardous waste analyses. Our services are tailored to meet the individual needs of our clients by providing high quality, cost-effective, and timely analytical data.

We would be happy to speak with you about your specific project needs.
