GLUT-3 Polyclonal Antibody

Cat #: G-AB-02773

Host: Rabbit **Reactivity:** Human

Isotype: IgG **Clonality:** Polyclonal

Overview:
Glucose transporter 3(orGLUT3), also known assolute carrier family 2, facilitated glucose transporter member 3(SLC2A3) is aproteinthat in humans is encoded by theSLC2A3gene. GLUT3facilitatesthe transport ofglucoseacross theplasma membranesof mammalian cells. GLUT3 is most known for its specific expression inneuronsand has originally been designated as the neuronal GLUT. GLUT3 has been studied in other cell types with specific glucose requirements, includingsperm, preimplantationembryos, circulatingwhite blood cellsandcarcinomacell lines. GLUT3 has both a higher affinity for glucose and at least a fivefold greater transport capacity than GLUT1, GLUT2 and GLUT4, which is particularly significant for its role in neuronal glucose transport, where ambient glucose levels are fivefold lower than in serum.

Gene ID:

Accession #: NP_008862

Immunogen: Synthetic peptide of human SLC2A3

Conjugation: Unconjugated

Swissprot: P11169

Calculated Molecular Weight: 54 kDa

Observed Molecular Weight:

Concentration: 0.3 mg/mL

Buffer: PBS with 0.05% sodium azide and 50% glycerol, PH7.4

Purification Method: Affinity purification

Application: WB,ELISA

Dilution: WB 1:500-1:2000

Storage: Store at -20°C. Avoid freeze / thaw cycles.
