Human C1QTNF1 (C1q and Tumor Necrosis Factor Related Protein 1) CLIA Kit

Cat #: G-EC-00822

Species: Human

Sensitivity: 0.38ng/mL

Type: Sandwich

Range: 0.63~40ng/mL

Detection: Chemiluminescence

Duration: 3.5h

Principle:
This CLIA kit uses the Sandwich-CLIA principle. The micro CLIA plate provided in this kit has been pre-coated with an antibody specific to Human C1QTNF1. Standards or samples are added to the micro CLIA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human C1QTNF1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human C1QTNF1, biotinylated detection antibody and Avidin-HRP conjugate will appear fluorescence. The Relative light unit (RLU) value is measured by the Chemiluminescence immunoassay analyzer. The RLU value is positively associated with the concentration of Human C1QTNF1. You can calculate the concentration of Human C1QTNF1 in the samples by comparing the RLU value of the samples to the standard curve.

Specificity:
This kit recognizes Human C1QTNF1 in samples. No significant cross-reactivity or interference between Human C1QTNF1 and analogues was observed.

UniProt ID:

Gene: C1QTNF1

Synonyms: CTRP1, GIP, ZSIG37, FLJ90694

Specimen: Serum, plasma and other biological fluids

Application: This CLIA kit applies to the in vitro quantitative determination of Human C1QTNF1 concentrations in Serum, plasma and other biolo

Research Areas: Cancer, Cardiovascular, Metabolism, Signal transduction

Storage:
An unopened kit can be stored at 2-8°C for 1 month. If the kit is not supposed to be used within 1 month, store the items separately according to the storage table in the manual once the kit is received.
